

Erratum to “Lie Hypergroups,”
Journal of Lie Theory 23 (2013), 127–142

M. Amini, A. Heydari, and M. Toomanian

Communicated by J. Faraut

Theorem 3.3 and most parts in Example 3.4 are not correct as stated. In Theorem 3.3, the double coset space $H\backslash G/H$ and orbit space G^H may fail to be a manifold (with boundary) and also there is a gap in the proof of smoothness of the convolution.
